

Word-Search Capability

Instructions

You can search for any word or phrase in *any* pdf that you open. Do this by pushing "Control" + F simultaneously on the keyboard of your PC computer ("Command" + F on a Macintosh). You'll see a little box at the top of the pdf that will be colored green and/or have the word "Find" in it. In that box, type the word or phrase that you wish to search for. Then hit "Enter" to discover the first occurrence of that word or phrase within the pdf. Hit "Enter" again to discover the next occurrence. And so on.
